

# ONE PLUS ONE EQUALS THREE. AT THE VERY LEAST.

The Nordic countries' two leading developers and makers of truck bodies and trailers have joined forces.

As one company, CMT and Parator will be an even stronger partner for the haulage industry.

That's because we share the same values in terms of customer service, innovation and quality.

In any project, right from the word go, we ensure we take into account your finances as well as the environment.

Our representatives can be found throughout the Nordic countries from Kokkola in Finland to Malmö in southern Sweden. They can talk you through what our products can do for you. Look forward to hearing from you.
